# AMBER ONYX

Amber Onyx with its beautiful color and translucent nature is quarried in south east of Iran.

Unlike its rivals, Amber onyx color will not fade in sunlight.

# Smeraldo ONYX

True to its name, Smeraldo onyx is one of the most beautiful semi-precious natural stone with unique green texture, coming from south east of Iran and can be processed in both cross cut and vein cut.

MARMARAN STONE

Since 1965

# Pink ONYX

---

Pink onyx is one of the rarest and most well-known natural stone which is quarried in north west of Iran. With its refined black vein, pink onyx is a harmonious blend of both classic and contemporary look.

# Galaxy ONYX

---

Black and white combination always gives a perfect look to any design, especially when it is accompanied by translucent effect.

Galaxy onyx has recently introduced to the market and is quarried in 250 km of Tehran, the capital of Iran.

# Emerald ONYX

As glowing as emerald, this onyx can be the jewel of any design. Emerald onyx is quarried in south east of Iran and can be processed in both vein cut and cross cut.
