

Since 1982 Stefano Andrei (Managing Director, CEO & Founder) has been dealt with stone, marble and granite.

Our transformation service was aimed at leading companies that have made important projects all over the world.

We have supported them by sawing and polishing the most different materials, whether they were granites, stones or marbles.

Over time, the company then turned into a company that began to carry out projects on its own, accumulating and making available to its customers the experience gained over the years.

Furthermore, we have always adapted to markets changing and their different needs, discovering, transforming and marketing the materials that the world of marble and fashion require.

Therefore, we go from time to time to an absolutely selective range of white marbles like BIANCO CARRARA, STATUARIO, CALACATTA, ARABESCATI and TRAVERTINI, to add to the national and import materials that our customers ask us to carry out their projects.

Since 2016 we have been in a joint venture with a company to handle Turkish materials, here you will find materials such as LILAC, DOLOMITE, ICEBERG, THUNDRA and others.

To all this we add that the work carried out for the various projects are of the highest quality and finishing, from simple polished edge to HONEYCOMB execution, rather than BACKLIGHTING realizations with tempered glass.

Our company, located in the capital city of marble, Carrara, has always carried out only the stone processing and marketing service.

We put customer relations at the center of our business strategy.

According to your needs we will find the best value for money for the realization of your projects.

I'm sure white marbles from Carrara and some of the other colors will be successful in your market.

Here below a selection:

**Bianco Carrara**

**Arabescato**
