About Us - Company

Since 2001 DDX has been providing innovative, reliable and easy-to-use software to operators in the wood, stone, glass and composite materials processing.

From CAD-CAM for CNC machines with plugins for project drawing and development to CRM and ERP, we supply software solutions and help our customer to win their business challenges.

Today the company counts more than 80 employees and around 9,000 customers worldwide and it is constantly growing.
