

MABELLA, our brand, aspires to become a leading example of high quality **natural stone production** and **customer service** in the global market. We have been working with the qualified engineers and employees in our quarry to extract the best samples and to proceed our quality in natural stone production as well. We have done Research and Development studies in **Şenyayla region** for four years before we start running our quarry. At the same time, we have obtained the **16 more quarries** in the same region, which we are going to start running gradually.

First we have started with our **Angelo Bella quarry** in **Yılanlı** and then **Bluette Bella quarry** in **İscehisar**. After that again in **Yılanlı region** we have started our **Felice Bella quarry**. Finally we have built **our own factory** and started processing our own material. We have been working in our factory delicately and keeping the quality standards as principle.

We have been continuously producing material from our quarries and factory and at the same time we have been **exporting** these material and using these in the **prestigious projects** in Turkey. We desire to offer you the best service in terms of production, quality check, product development, supply, marketing, transporting and sales with our qualified coworkers.
